PARTNERS

GlycanAge

**Karolinska
Institutet**

Welcome to SYNHEALTH – an innovative project set to reshape Europe's preventive healthcare approach.

This pioneering research program, funded by the Horizon Europe Programme, aims to shift Europe's approach to remedial healthcare through the adoption of Genos research on glycan biomarkers for personalized preventive healthcare.

KEY OBJECTIVES

Develop person-centred AI based support tool to enable scalability of GlycanAge personalised counselling

Demonstrate adoption of glycan biomarkers for personalised preventive healthcare in real world setting and create a network of partners in the region

Prepare clinical study for glycan biomarkers for personalised preventive medicine

Improve capacity for innovation, IP management and knowledge transfer

Maximise the impact of the project through a dedicated communication, dissemination and exploitation strategy.

**Funded by
the European Union**
